## **ACCP LEARNING CATEGORIES**

ACCP Learning Categories organize education activities based on how education is delivered to promote a wider variety of methodologies. The sessions presented during this course are labeled to identify the type of instruction and methodology used, so you can determine how the presentation will meet your learning style and educational goals. ACCP Learning Categories have no pre-determined requirements. Your online CME certificate will reflect your ACCP Learning Categories. The ACCP Learning Categories are:

ACCP Learning Category I: Lecture-Based

ACCP Learning Category II: Self-Directed

ACCP Learning Category III:  
Evidence-Based

ACCP Learning Category IV:  
Case- and Problem-Based

ACCP Learning Category V: Simulation

ACCP Learning Category VI:  
Quality Improvement

## **MAINTENANCE OF LICENSURE**

The ACCP Learning Categories are further subcategorized into Maintenance of Licensure (MOL) areas. The subcategorization is very helpful for applying CME to state requirements. All of the sessions in this program are subcategorized as MOL: Scope of Practice-Sleep Medicine Education.

More information about the ACCP Learning Categories is available online at [www.chestnet.org/education.index.php](http://www.chestnet.org/education.index.php).
