Massachusetts	454	Washington	250
Michigan	354	West Virginia	77
Minnesota	209	Wisconsin	196
Mississippi	87	Wyoming	7
Missouri	280	Total US	6,591

Source: AMA Physician Masterfile (December 31, 2008)

All physicians (MDs and DOs) who report working in administration, direct patient care, medical research, medical teaching, or other non-patient care activities are considered active. Physicians whose major professional activity is unclassified are also considered active. Physicians who are classified as retired, semi-retired, temporarily not in practice, or not active for other reasons are excluded. Residents and fellows are also excluded.

All data refer to physicians who are active in the 50 states of the United States and the District of Columbia—regardless of where they attended medical or osteopathic school. Physicians active in other areas, such as Puerto Rico and other US territories, are excluded. To determine whether or not an active physician is in the United States, the location of the physician's office was used. In cases where the office state was missing, the state from the preferred mailing address was used.

Physicians whose primary specialty is one of the following are included in these figures:

- Critical Care Medicine (Anesthesiology)
- Critical Care Medicine (Internal Medicine)
- Pulmonary & Critical Care Medicine
- Pulmonary Disease
